

Innovative add-ons

Sales app

The SDP sales app is a mobile application for managers who want to stay on top of sales results at any time and place. This app gives you realtime acces to your company figures on any mobile device.

Websites

Let our experienced web developers create a website for you. Completely personalized, matching your taste and corporate design. Manage content with the user-friendly content management (CMS). The website's responsive design will certainly fit the omnichannel strategy of your car wash. Announcing promotions or open days will be a piece of cake. When you work with prepaid car wash cards, the customer can request real-time information about the remaining credit and the visits/recharging history.

Software for
the innovative carwash

Software • Hardware • Training • Support • Web Services

- Multi-functional cash register
- App for smartphone and tablet
- Prepaid car wash card
- Manage car wash PLC

SDP Robinson: software for the innovative carwash

Choose SDP Robinson and get secure and stable cash register software developed specifically for car wash companies. This package helps many car wash companies to decrease the administration and increase the efficiency. With this car wash software you will keep up with your competitors.

Multi-functional cash register

The SDP cash register software turns a touch screen into much more than a cash register:

- set car wash programs
- reload and consult credit on prepaid car wash card
- create new customers
- print invoices
- print/email cash register reports

You create customer invoices easily at the cash register and (cash register) reports can be printed or automatically sent by e-mail.

App for smartphone and tablet

A mobile cash register is also available: indicate the right order for the car wash programs through an app on your tablet or smartphone. This lets you avoid long line-ups, and you don't have to walk to the cash register to set the program every time. This device is connected to your cash register software and makes the PLC of the car wash running.

Prepaid car wash card

SDP develops a customer loyalty card for your car wash at your request. You can choose to assign free car washes or discounts based on visits or amounts spent.

Customer loyalty cards provide useful information about the customers' purchase behaviour which can be used for segmented and more effective promotions.

If you want to take it one step further, there is the option of the prepaid car wash card.

Customers choose the top up amount and use this credit to pay in your car wash. You scan the card

at the cash register and the remaining balance will be printed on the receipt. Customer can also request real-time information about the remaining credit and the visit/recharging history on your website at any moment.
